

## **Eyecom<sup>3</sup> and the American Recovery and Reimbursement Act (ARRA / HITECH ACT)**

Eyecom<sup>3</sup> is committed to complying with the new EHR federal government certification standards. Our goal is to ensure that Eyecom<sup>3</sup> clients will be eligible to receive the full benefits of the ARRA and HITECH ACT stimulus funding.

As soon as the guidelines for optometry and ophthalmology are released, (currently scheduled for 2010) we will follow the specifications provided to apply for certification. Eyecom<sup>3</sup> anticipates that clients will need to implement the Electronic Medical Record module in order to qualify for the EHR reimbursement. Additionally, proof of “meaningful use” is required for practices and providers to receive incentives for using an electronic health record system.

Please contact Eyecom<sup>3</sup> for additional information regarding Eyecom<sup>3</sup> and the ARRA.
